DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/29/06 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re: claim 1. Applicant argues a distinction between "increase" and "increment" in claim 1, however, the distinction is unclear in claim 1. Claim 1 recites that the "front wheel braking force increases" in line 7 of claim 1 then in line 9 claim 1 recites "to further increment the front wheel braking force." Examiner maintains that the claim language reads as if increase and increment are synonymous. Examiner suggests using the claim language ("a braking force increment on the front wheels beyond the

braking force increase”) recited in lines 2-3 from the bottom of claim 4 to clearly set forth the distinction and eliminate the confusion.

The remaining claims are indefinite due to their dependency from claim 1.

Allowable Subject Matter

4. Claims 4-13 are allowed. Claim 4 includes a clear distinction between “increase” and “increment” by reciting both the braking force increase of the front wheel and the increment of the front wheels beyond the braking force increase. The prior art of record fails to include the specific relationship between the front and rear wheel braking operation and the relationship between the increase of the front wheel braking force and the increment of the front wheels beyond the braking force increase.

Response to Arguments

5. Applicant’s arguments, see pg. 9 of the Remarks, filed 3/29/06, with respect to claims 1-13 have been fully considered and are persuasive. The 102 and 103 rejections of the claims have been withdrawn. However, please note the 112 2nd rejection of claim 1.
